Pro Audio Stories

To show the pro audio capabilities of the Bass50 and our ThinDriver® tech, we sought to tell stories of how real audio professionals use Trulli products in ways they couldn't with other subwoofers.

Trulli Different

This video explains how—from the ground up—the Trulli Bass50 was built to bring high quality low end wherever, whenever. We see why an automotive bass competition champion chooses to roll with the Bass50, and how Redline Chicago uses the Bass50's battery powered capabilities to create off grid musical experiences.

No Power, No Problem

This video shows the story of Garrett Birch, one of the creators of ARC Music Festival, and how he experienced one of the worst things to happen during a live event—a power failure. But because the Bass50 is battery powered, the show went on. This inspired Garrett to get creative and explore other off-the-grid experiences.

Bring Music to Where the People Are

The DJ Firm is driven to constantly push themselves to create cutting edge designs and experiences for the sole purpose of giving people a closer and more personal connection to their music. In this video, we see how they created a unique approach to a parade float, which enabled them to literally bring the music to the people.
